1994 June

Astronomy Meetings

comparable depth. The need is all the greater in that the social and intellectual background to Friedmann’s life and work through the period from 1890 to 1925 is poorly known.

These are, however, projects for the next generation of historians of science. The wonderful thing is that we at last have access to the broad outlines of the career of one of the most remarkable figures of 20th-century cosmology. This biography makes quite fascinating, if idiosyncratic, reading and can be strongly recommended. — Malcolm S. Longair.

ASTRONOMY MEETINGS

Compiled by Elizabeth Bryson
Canada-France-Hawaii Telescope Corporation

This incremental listing augments those in previous issues and covers 12 months from 1994 July 1.

July 8–13 Nuclei in the Cosmos (Third International Symposium), Gran Sasso, Italy. Contact: Claudi Maria Raiteri, Osservatorio Astronomico di Torino, Strada Osservatorio 20, 10025 Pino Torinese, Italy [Internet: mic94@to.astro.it].

July 18–29 Summer School in Astrophysical Observations, Observatoire de Haute-Provence, France. Contact: M. P. Veron, Observatoire de Haute Provence, F-04870 Saint-Michel-l’Observatoire, France [Internet: mira@obshpa.obs-hp.fr].

July 22–25 Neural Network Applications in Astronomy, Steward Observatory, University of Arizona, Tucson. Contact: Ray White, Steward Observatory, University of Arizona, Tucson, AZ 85721, USA [Internet: rwhite@az.arizona.edu].

July 25–29 The Opacity of Spiral Disks (NATO Advanced Study Workshop), Cardiff, Wales. Contact: J. I. Davies, Dept. of Physics and Astronomy, University of Wales, College of Cardiff, PO Box 913, Cardiff CF2 3YB, Wales.

Aug. 3–6 Radio Astronomy: Visions for the 21st Century (Workshop), Penticton, B.C., Canada. Contact: Lloyd Higgs, Dominion Radio Astrophysical Observatory, PO Box 428, Penticton, B.C., Canada, V2A 6K3 [Internet: director@drao.nrc.ca].

Aug. 8–19 Particle Physics, Astrophysics, and Cosmology (22nd Annual SLAC Summer Institute on Particle Physics), Stanford, CA. Contact: Ms. Lilian Vassilian, SLAC, PO Box 4349, MS 62, Stanford, CA 94309, USA [Internet: ssi@slac.stanford.edu].

Aug. 15–17 Astronomical and Astrophysical Objectives of Sub-milliarcsecond Optical Astrometry (IAU Symp. 166), The Hague, The Netherlands. Contact: Jean Kovalevsky, Observatoire de la Côte d’Azur, CERGA, Avenue Copernic, F-06130 Grasse, France [Internet: kovalevsky@mff.cnes.fr].
